Area of interest includes soil, agricultural and environmental Microbiology and microbial biotechnology. , abstract: There are considerable evidences that support the specific role of phosphate solubilization in the enhancement of plant growth by phosphate solubilizing microorganisms. In this regard i had isolated a bacterial strain which could solubilize phosphate to a considerable level, hence i selected the organism and subjected it to further studies involving different parameters. Phosphate solubilizing microorganisms include bacteria and fungi which convert insoluble inorganic phosphatic compounds into soluble form. The species of Pseudomonas, Micrococcus, Bacillus, Bradyrhizobium, Agrobacterium, Rhizobium, Flavobacterium, Penicillium, Fusarium, Sclerotium, Aspergillus, Curvularia, Mucor and others have been reported to be active...
