Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Astronomy This series is intended to meet the requirement of brief text-books both for schools and for adult readers who wish to review or expand their knowledge. The grade of the books is intermediate between the so-called primers and the larger works professing to present quite detailed views of the respective subjects. Such a notion as a person beyond childhood requires of some subjects, it is difficult and perhaps impossible to convey in one such volume. Therefore, occasionally a volume is given to each of the main departments into which a subject naturally falls - for instance, a volume to the Zoology of the vertebrates, and one that of the invertebrates. While this arrangement supplies a compendious treatment for those who wish, it will also sometimes enable the reader interested in only a portion of the field covered by a science, to study the part he is interested in, without getting a book covering the whole. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
