Brand New Book ***** Print on Demand *****.Excerpt from The Mechanism of Evolution in Leptinotarsa The data and conclusions presented in part in this volume are the product of a project in which it was attempted to attack the evolution problem in one set of organisms from a number of different aspects. Evolution in organisms must be conceived of as the product of the interaction of internal and external factors, operating in strict mechanistic manner, as in non-vital phenomena, so that the central problem was the determination and proof of the mechanism of action of these two groups of factors whose operations are productive of evolutionary changes. Experimental analysis of the problems, prosecuted with rigor and thoroughness, has been held to be the only means of progress. Before this ideal could be applied much preliminary clearing of the ground had to be done, and to this I gave the necessary attention in a report published under the title An Investigation of Evolution in Chrysomelid Beetles of the Genus Leptinotarsa. The results of the project have been the development of a mechanistic conception of evolution...
